communication channels of the Information Society.

The BRICKS Integrated Project aims at establishing the organisational and technological foundations of Internet-based digital libraries for the benefit of all users and access methods. The results of vBRICKS Community.

In order to realise this ambitious goal, BRICKS must improve the state of the art in Digital Libraries in the following aspects

- Employment of a service-oriented architecture

-

JZAS[

- It uses open standards and an open source software development approach;
- It is based on an open community for enlarging and enforcing its resources and input from researchers, scientists and users.
